PROJECTS

Automatic Wire Cutting/Stripper Machine.

Description:-Wires are used for electrical connections in a wide variety of electronics products, industrial machines, switchboards etc. Many of the products and machines require wires of specific sizes for production purposes. So here we design an automatic wire cutting and stripping machine for instant wire cutting and stripping..

E-Commerce Website(Spring Boot)

Description:-Where in this project we consider Three modules of merchant, Admin and customer and established the connection between the products by using ORM concept MAPPING. Through this we can easily identify the number of products that are produced by merchants.Later customer can add to cart to buy the products.This project involves in many things like annotations,mapping, repositories,inbuilt tomcat server and so on.
